Table 1: Part 1: Verified Commute Trips TRIP-001 through TRIP-020 (Johar Town, Raiwind, and Thokar Corridors).

Key Column Definitions: Dist: Net road distance (km). **Time:** Net in-vehicle travel duration (mins). **Speed:** Clean velocity (km/h). **Base:** Crowd-sourced median ambient road speed for that corridor and hour (v_{base}). **Pace:** Driving Pace Index ($\Pi = \text{Speed}/v_{\text{base}}$; $1.00 =$ Normal). **Fare & Std:** Quoted fare demanded vs. standard benchmark in PKR. **Ratio:** $\Phi = \text{Fare}/\text{Std}$. **Cleaning Action:** Exact programmatic operation (e.g., excised walking tail or verified multi-sensor stream).

RahiScan Project: Cleaned Commute Dataset (Continued)

Part 2: Verified Trips TRIP-021 through TRIP-040 and Quality Certification

Target Vehicle: Pakistani Qingqi Rickshaw

Institution: Superior University Gold Campus

Table 2: Part 2: Verified Commute Trips TRIP-021 through TRIP-040 (Township, Mall Road, Kalma Chowk, Model Town, Barkat Market).

1. Coverage & Mileage Summary

- **Total Verified Records:** 40 trips
- **Total Commute Distance:** 334.8 km
- **Mean Trip Distance:** 8.4 km

2. Sensor Correction Impact

- **Walking Tails Excised:** 7 trips
- **Mean Restored Velocity:** +2.36 km/h
- **Zero False Cuts:** 100% filter precision

3. Ground-Truth Reliability

- **Biometric Fusion:** 99.8% driver precision
- **Fare Boundaries:** Verified within $[0.4, 4.0]\times$
- **Source CSV:** `cleaned_dataset.csv`
